

# The AP Equipment Health Check

Our equipment is made to the highest standards ensuring that it is fit for purpose and built to last. However, with your equipment going through sustained and often intensive use, it's important that you take care of it.

## Performance is an absolute

The smooth running of your gym depends on a good maintenance routine, correct use and scheduled servicing of your gym equipment. The reality is you probably don't have the time to carry out regular checks, or the expertise and tools to service your gym equipment yourselves.

To get the best out of your Absolute Performance kit, we now offer a range of preventative maintenance service packages, known as the AP Equipment Health Check.

The AP Equipment Health Check means that with regular servicing we can help to prevent costly repair so that your kit lasts longer. For a fixed fee, we'll visit your gym and carry out a full check of all your equipment. We'll look for any potential faults and prevent problems from occurring by dealing with issues quickly and efficiently.

With the AP Health Check, your gym equipment will continue to perform at its best, giving you peace of mind that everything is working as it should and reassurance that you're actively complying with your insurance requirements – just in case.

## The Full Service

During a service, our engineers will follow a checklist for each item of equipment and look for any potential faults or wear and tear.

### ① Cosmetic Check

This involves a cosmetic inspection of your equipment, looking for visual signs of wear and tear such as splits to cables, wear on upholstery, split grips or missing items such as weight pins.

### ② Functional Service

This includes testing every piece of equipment to ensure that there are no missing or loose bolts or defects to welds, and that the machine is in full working order. This part of the service includes adjustments which can be done on-site but it doesn't include repairs or replacement parts.

### ③ Full report

You'll then get a full service report, with photos and recommendations on what adjustments need to be made after our visit and a quote for any replacement parts that are not covered by warranties.

## Peace of mind in a package

With your equipment in good working order, your gym can run as smoothly as possible, saving you time and hassle, and in the long term it'll make your investment last longer too.

We offer several packages depending on how often you would like your equipment to be serviced.

Level 1	Quarterly	£425 + vat
Level 2	Twice a year	£455 + vat
Level 3	Once a year	£495 + vat

*We also provide bespoke packages to suit your particular requirements*
